

Executive Summary - Unique Value Proposition

Integrated Consulting Excellence

SEA Capita delivers transformational results through our unique integration of supply chain optimization, energy sector expertise, and Al applications

- Systems Engineering Rigor
- Real Options Strategic Thinking
- Sprint Methodology Delivery
- Program Office Excellence

Next-generation consulting firm addressing interconnected business challenges

Serving organizations across all sectors with supply chain needs and the entire energy value chain

What Sets Us Apart

Multi-Domain Integration

Combining supply chain, energy, and Al expertise

Proven Methodologies

Systems engineering and real options frameworks

Agile Delivery

Sprint methodology with program office governance

Quantifiable Results

15-40% operational improvements across engagements

Market Challenges & Opportunities

Critical Business Challenges Driving Demand

Economic & Geopolitical

- Global supply chain disruptions
- Energy price volatility & security
- Climate change operational impacts

Technology Adoption

- Digital transformation complexity
- Al implementation hurdles
- Emerging tech skills gaps

Organizational Transformation

- Cultural resistance to change
- Resource constraints & priorities
- Demonstrating clear ROI

✓ Significant Growth Opportunities

\$4.4T Al productivity potential globally

Key Market & Consulting Trends

- Accelerated digital transformation
- Demand for supply chain resilience
- New models from energy transition
- Rising demand for specialized expertise

Our Strategic Response

Response Elements

- Focus on high-growth, high-value segments
- Develop thought leadership in key areas
- Build strategic partnerships & alliances
- Invest in technology and capabilities

Value Prop: Integrated solutions across domains

SEA Capita Framework Overview

Integrated Multi-Domain Consulting Framework

Our approach combines domain expertise with proven methodologies for comprehensive business transformation.

Core Principle: Systems thinking for complex business challenges.

Supply Chain Consulting Deep Dive

Comprehensive Supply Chain Optimization

Retwork Optimization & Logistics

- End-to-end network redesign with Al transport optimization.
- Warehouse management and digital twin integration.

Integrated Planning & Visibility

- Al-driven demand forecasting and inventory optimization.
- Real-time visibility platforms with SIOP synchronization.

(Risk & Resilience Management

- Al-powered disruption prediction & risk assessment.
- Supply base diversification and ESG integration.

Digital Transformation & Al

- Generative Al for forecasting and process automation.
- IoT, 5G, and predictive maintenance integration.

Quantified Value Outcomes

\$ 10-20%

Logistics & transportation cost reduction

20-30%

Enhancement in customer satisfaction

40-60%

Reduction in excess inventory

~₹

Up to 8%

Revenue increase through improved planning

Supply Chain Al Integration

(1) Al-Powered Supply Chain Revolution

Leveraging AI and machine learning to revolutionize supply chain management.

Al adopters report 15% lower logistics costs & 35% improved service levels.

Al Applications Across Supply Chain Functions

Demand Forecasting

30% forecast improvement via enhanced accuracy.

Predictive Maintenance

Cut downtime by 25% with enhanced reliability.

Autonomous Operations

Reduce manual work by 50% with real-time optimization.

Risk Intelligence

40% faster risk response with early warnings.

Comprehensive Implementation Benefits

Technology

- loT & 5G for real-time data
- Digital twins for modeling
- Blockchain for transparency

Operational

- Autonomous ops reduce manual work
- Predictive maintenance boosts reliability
- Real-time supplier visibility

Strategic

- Data-driven decision-making
- Al-driven competitive advantage
- Future-ready supply chain

Typical ROI: 3-5X within 18 months of Al implementation

Energy Sector Consulting Overview

End-to-End Energy Value Chain Expertise

We provide end-to-end consulting for the energy sector, guiding companies through the transition by focusing on sustainability, efficiency, and digital innovation.

SEA Capita is uniquely positioned to guide energy companies through complex transitions and optimization challenges.

Upstream Solutions

- E&P and Asset Integrity Optimization
- Al-driven Production & Well Construction
- Digital Oilfield & Predictive Maintenance

15-30% efficiency improvement

Midstream Solutions

- Pipeline, Storage & Compression
- Hydrocarbon Processing Optimization
- Pipeline Integrity & Safety Protocols

25% operational cost reduction

Downstream Solutions

- Refining & Distribution Network Efficiency
- Decarbonization & Alternative Fuels
- Carbon Capture & Circular Economy

10-20% emissions reduction

Upstream Energy Solutions

Comprehensive Upstream Consulting

Exploration & Production

Capabilities:

- Geological & Viability Analysis
- Asset Integrity Mgmt.

Approach:

Data-driven expertise

Al-Powered Optimization

Capabilities:

- Al Production Forecasting
- Reservoir Management

Approach:

ML for pattern recognition

○ Compliance & Risk

Capabilities:

- Regulatory Frameworks
- ESG Risk Mitigation

Approach:

Proactive ESG compliance

Capabilities:

- Safety Protocol Dev.
- Operational Risk Assess.

Approach:

Reduction in operational costs

Technology Advantages

- Real-time monitoring & control
- Predictive analytics for maintenance

40%

Equipment efficiency improvement

Strategic Outcomes

- Improved regulatory compliance
- Enhanced operational resilience

30%

Reduction in emissions

95%

Enhanced safety metrics

Client Success

Midstream client achieved \$15M annual savings with 95% uptime.

Downstream Energy Solutions

Comprehensive Downstream Operations

Refining & Distribution

Optimizing refinery processes and scheduling to maximize yield and improve efficiency.

@ Quality Control Systems

Ensuring product quality and regulatory compliance through robust QA frameworks.

Market & Pricing Strategy

Leveraging market intelligence and pricing models to optimize revenue streams.

Distribution Network

Enhancing logistics and network design for greater cost and service efficiency.

Sustainability & Innovation

Driving 15-30% efficiency gains

Decarbonization Pathways

Implementing carbon footprint assessment and clean tech integration.

10-20% emissions reduction

Alternative Fuel Production

Developing biofuel and hydrogen strategies for a diversified fuel portfolio.

Diversified fuel portfolio

ැදී Circular Economy

Executing waste reduction programs and promoting resource efficiency.

Resource optimization

Carbon Capture & Storage

Assessing and planning for CCS technology implementation.

Advanced emission control

Renewable Energy Consulting

Leading the Energy Transition

Guiding organizations through the complex transition to sustainable energy systems with comprehensive consulting services.

Renewable energy sector represents a \$4.5 trillion investment opportunity through 2030.

Renewable Energy Integration

- Solar & Wind Project Development
 Site assessment, feasibility studies, and technology optimization.
- Grid Integration & Storage

 Grid connection planning, smart grid integration, and energy storage solutions.
- Renewable Portfolio Management
 Asset portfolio optimization, performance tracking, and risk management.

Market Analysis & Strategy

- Investment Decision Analysis
 Financial modeling, ROI, risk assessment, and market opportunity analysis.
- Policy & Regulatory Navigation
 Regulatory compliance, policy impact assessment, and incentive optimization.
- Stakeholder Engagement
 Community engagement, regulatory liaison, and public-private partnerships.

Energy Transition Value Delivery

20-35%

Reduction in energy costs

3-5X

Return on investment

50-80%

Carbon footprint reduction

95%

Enhanced energy security

Al Applications in Business Consulting

Transforming Business Through Artificial Intelligence

Strategic Al implementation to drive efficiency, enhance decision-making, and create sustainable competitive advantages.

\$4.4 trillion potential global productivity impact from Al applications

SEA Capita's approach: Ethical AI deployment with governance frameworks and measurable business outcomes.

Strategic Al Implementation

- Strategy & Decision-Making
 - Al-driven scenario planning
 - Risk assessment & mitigation
- □ Data Analytics & Insights
 - Predictive analytics
 - Customer behavior analysis

- Automation & Efficiency
 - Routine task automation
 - Customer service enhancement
- **○** Ethical Al & Governance
 - Al ethics frameworks
 - Regulatory compliance

Industry-Specific Al Solutions

Supply Chain Optimization

- ML for demand forecasting
- Route & inventory optimization

Healthcare Operations

- Patient experience optimization
- Predictive diagnostics

Financial Services

- Risk management & fraud detection
- Customer personalization

Manufacturing

- Predictive maintenance
- Quality control automation

Clients achieve ROI within 12-18 months of AI implementation

Al Strategy & Implementation

Comprehensive Al Strategy

Phase 1: Al Readiness Assessment

- Assess current capabilities & infrastructure
- Analyze skills gaps & change readiness

Outcome: Baseline understanding & readiness score

| Phase 2: Business Case Development

- Develop business cases & ROI models
- Prioritize use cases & assess risks

Outcome: Compelling business case with clear ROI

鈴 Phase 3: Implementation Roadmap

- Define roadmap, milestones & resources
- Set success metrics & technology criteria

Outcome: Detailed plan with clear timelines

Phase 4: Change Management

- Drive stakeholder engagement & communication
- Manage organizational change & build capabilities

Outcome: Organization-wide alignment & buy-in

Implementation & Value Delivery

袋 Technology Integration

- Select and integrate best-in-class Al tools
- Ensure data quality and validate models

→ Performance & Optimization

- Track real-time performance and model accuracy
- Implement continuous improvement & ROI reporting

Value Delivery Metrics

Up to 35%
Productivity Gains
90%+
Accuracy Lift

25-50% Cost Savings 15%

Revenue Impact

Implementation Success

- Initial results within 3-6 months
- Positive ROI achieved in 12-18 months
- 95% of projects meet or exceed targets

Systems Engineering Framework

Holistic Systems Engineering Approach

Our rigorous methodology ensures comprehensive solution design and seamless integration by applying systems thinking to core business transformation challenges.

Value Promise: Systematic cost containment, risk reduction, and quality improvement.

Requirements Engineering

Stakeholder Requirements Definition

System Requirements & Traceability

Risk reduction

Real Options Theory

Strategic Flexibility Through Real Options

Real Options Theory treats investments as a portfolio of options, providing a framework for making strategic decisions under uncertainty. This approach is highly valuable in volatile markets.

Core Value: Maximizes upside potential while limiting downside risk through strategic flexibility.

Strategic Flexibility Framework

View investments as options to be exercised, abandoned, or modified, enhancing resource allocation flexibility.

Managerial Discretion

Create value through management's ability to adapt to changing conditions, enabling dynamic value optimization.

→ Asymmetric Risk-Return

Employ strategies that maximize upside potential while limiting downside exposure for optimal risk-return trade-offs.

♦ Adaptive Strategies

Utilize a framework for decision-making in uncertain environments, building resilience and adaptability.

Real Options Types & Applications

Expansion Options

The right to scale up investments based on market success, ideal for market entry and growth strategies.

Abandonment Options

The right to exit or divest from underperforming investments, used for risk mitigation and portfolio optimization.

Deferral Options

The right to delay decisions to gather more information, optimizing timing and reducing uncertainty.

Switching Options

The right to change operational modes or strategic direction, providing operational flexibility and adaptation.

Real Options Applications

Strategic Business Applications

International Business Strategy

- Market entry timing and scale
- Entry mode selection (JVs, acquisitions)
- Multinational network optimization

Value: Optimized global expansion with managed risk.

Project & Investment Management

- R&D portfolio management
- Infrastructure investment phasing
- Technology adoption strategies

Value: Enhanced capital allocation and timing.

Strategic Planning

- Merger and acquisition valuation
- Strategic partnership structuring
- Innovation pipeline management

Value: Strategic flexibility in complex transactions.

鄭 Operational Flexibility

- Production capacity scaling
- Supply chain diversification

Value: Adaptive operational capabilities.

Valuation & Value Creation

Li Financial Modeling Approaches

- Black-Scholes for real assets
- Binomial tree modeling for sequential decisions
- Monte Carlo simulation for complex scenarios

✓ Strategic Analysis Tools

- Decision tree analysis for sequential options
- Scenario planning with probability weighting
- Sensitivity analysis for key variables

Value Creation Benefits

- Strategic Flexibility: Enhanced adaptability
- Capital Allocation: Improved decisions
- Risk Mitigation: Option-based risk reduction
- Competitive Advantage: Market timing optimization

Quantified Outcomes

20-35%

Investment Performance

15-25%

Increase in Option Value

40%

Downside Risk Reduction

90%+

Decision Quality

Sprint Methodology

Agile Consulting Delivery Framework

Iterative consulting that maximizes value via collaboration, prototyping, and continuous improvement.

Core Philosophy: Deliver working solutions early and often with continuous client feedback.

Sprint Structure & Implementation

Sprint Framework

Duration

Planning

Execution

Review

1-4 week iterations

Collaborative goal-setting

Daily progress tracking

Stakeholder feedback loop

Key Roles

- Product Owner: Client liaison, prioritizes requirements
- Scrum Master: Facilitates process, removes obstacles
- Consulting Team: Executes delivery

Sprint Activities

- Backlog Refinement: Prioritize & clarify requirements
- Sprint Goals: Define success criteria & objectives
- Retrospectives: Continuously optimize process

Delivery Advantages & Outcomes

Delivery Benefits

- Faster time-to-value with iterative delivery
- Reduced project risk through frequent validation
- Higher satisfaction via continuous engagement

Client Engagement Model

- Frequent Feedback: Regular client collaboration
- Iterative Delivery: Incremental working solutions
- Rapid Prototyping: Quick concept validation

Team Engagement

Program Office Excellence

Strategic Program Management Office (PMO)

A comprehensive framework ensuring strategic alignment, operational excellence, and superior execution for complex multi-workstream engagements.

Core Value: Enterprise-level coordination, standardized processes, and performance optimization.

Portfolio Management

- Strategic Portfolio & Goal Alignment
- Project Prioritization & Resource
 Optimization
- Governance, Risk & Compliance Oversight
- Performance Measurement & ROI Tracking

Operational Excellence

- Process Standardization & Improvement
- Quality Assurance & Performance Monitoring
- Risk Identification & Mitigation
- Stakeholder Communication & Reporting

Organizational Development

- Project Management Maturity Assessment
- Capability Development & Skills Training
- Change Management & Culture Transformation
- Leadership & Performance Coaching

Client Value Delivery

Client-Centric Value Creation Framework

Scalable value delivery tailored to client size, focusing on measurable outcomes.

Pricing is tied to client ROI with outcome-focused fees.

Focus on financial impact (EBITDA, ROI) & strategic goal achievement.

Large Enterprise

Service Model:

Comprehensive Transformation Programs.

Delivery Method:

Integrated Program Office for coordination.

15-30%

EBITDA Improvement

\$100M synergy for a Fortune 500 client.

Mid-Market

Service Model:

Focused Initiatives with rapid deployment.

Delivery Method:

Sprint-Based Agile Delivery for rapid value.

5X ROI

On Consulting Investments

300% revenue growth for a manufacturer.

Small Business

Service Model:

Targeted Interventions with templates & coaching.

Delivery Method:

Lean Consulting & Technology for rapid growth.

25-50%

Efficiency Improvement

\$5M Series A funding for a tech startup.

Case Study Scenarios

☐ Global Supply Chain Transformation

Client: Global Manufacturer (\$2B revenue)

Challenge

Revenue loss from disruptions, poor supplier visibility, and high inventory costs.

SEA Capita Solution

Deployed Al visibility platform, risk management, and supplier diversification.

Results Achieved

\$40M	65%
Annual Savings	Service Level Up
30% Carrying Cost Down	90% Visibility Gained

\$ Financial Services Al Strategy

Client: Financial services firm seeking advantage

Challenge

Manual process inefficiencies, poor customer experience, and increasing risk.

SEA Capita Solution

Developed Al strategy with sprint-based deployment & ethics framework.

Results Achieved

35%	50%
Efficiency Up	Manual Work Down
\$25M	99%
Revenue Increase	Risk Accuracy

Midstream Energy Digital Transformation

Client: Mid-stream energy co. with aging assets

Challenge

Regulatory pressure, operational inefficiencies, and limited digital capabilities.

SEA Capita Solution

Modernized infrastructure with AI predictive maintenance & program office.

Results Achieved

\$15M	40%
Annual Savings	Efficiency Up
30%	95%
Emissions Down	Uptime Achieved

Conglomerate Integration Excellence

Client: Large conglomerate with multiple BUs

Challenge

Lack of synergy, complex stakeholder management, and need for integration.

SEA Capita Solution

Implemented integrated program office with systems engineering & sprints.

Results Achieved

own	40% Collaboration Up	\$100M Synergy Realized
	30%	85%
′	Faster Decisions	Stakeholder Satisfaction
22 • SEA Capita - Integra	Ited Excellence	

Implementation Roadmap

Structured Implementation Approach

A phased roadmap delivering immediate value while building towards long-term transformation.

Our methodology blends systems engineering with agile delivery for optimal results.

Comprehensive Implementation Timeline

Phase 1

Month 1-2

Activities

- Current state assessment
- Strategic framework dev

Deliverables

- Assessment report
- Strategic roadmap

Phase 2

Activities

Month 2-4

- Core system implementation
- Process optimization

Deliverables

- System deployment
- Process improvements

Phase 3

Month 4-8

Activities

- Al & technology integration
- Advanced analytics

Deliverables

- Advanced systems
- Performance dashboards

Phase 4

Month 8-12

Activities

- Performance optimization
- Scaling initiatives

Deliverables

- Optimized systems
- Scaled operations

Phase 5
Month 12+

Activities

- Ongoing optimization
- Innovation integration

Deliverables

- Improvement programs
- Innovation roadmaps

Partnership Approach

Strategic Partnership Philosophy

True Partnership Beyond Consulting

We build strategic partnerships for long-term value and sustainable transformation, engaging collaboratively with shared risk and success.

- Deep Strategic Alignment
- Shared goal definition
- Long-term vision
- ন্ত্ৰ Risk & Value Sharing
- Performance-based pricing
- Mutual investment

്ല Collaborative Execution

- Joint team formation
- Capability building focus

- Continuous innovation
- Market opportunity exploration

Engagement Models & Benefits

Engagement Models

Transformation Partnership

End-to-end program management.

Capability Development

Targeted skills & knowledge transfer.

Strategic Advisory

Executive guidance & support.

Innovation Partnership

Joint technology advancement.

Partnership Benefits

90%+

Long-Term Client Satisfaction

100%

Sustained Value Creation

- Enhanced Capabilities: Build internal self-sufficiency.
- Strategic Advantage: Secure long-term competitive positioning.

Our success is measured by your long-term success.
